The NIS provides information on the current operational status, effective policies, and general information for GPS, DGPS, and LORAN-C. The NIS also disseminates Safety Broadcasts (BNM), Local Notice to Mariners (LNM), and the latest Notice Advisory to Navstar Users (NANU). NANU notices can be obtained via email subscription through the USCG Navigation Center website: <http://www.navcen.uscg.gov/gps/status/default.htm>.

In addition, the NIS investigates all reports of degradation or loss of GPS, DGPS or LORAN service. Mariners are encouraged to report all degradation or loss of radio navigation services to the NIS via any of the following: Phone: (703) 313-5900, Email: [webmaster@smtp.navcen.uscg.mil](mailto:webmaster@smtp.navcen.uscg.mil), or on the World Wide Web at: <http://www.navcen.uscg.gov>

## SECTION I - SPECIAL NOTICES

This section contains information of special concern to the Mariner.

### APPROVAL OF GPS NAVIGATIONAL SYSTEM TESTING (CFSTLANT 2009-001)

The GPS Navigational Signal may be unreliable from 12-27 January 2009 from 0200Z – 0400Z and 1800Z – 2000Z due to testing on GPS frequencies used in shipboard navigation and handheld systems. GPS systems that rely on GPS, such as E-911 AIS and DSC, may be affected approximately 55 NM north east of Ponce de Leon Inlet at an approximate testing center point of 30 29 48N 079 46 06W, with a possible impact radius 203 NM of center point.

During this point GPS users are encouraged to report any GPS service outage that they may experience during this testing via the navigation information service (NIS) by calling (703) 313-5900 or by using the NAVCEN's web-site "GPS REPORT A PROBLEM" worksheet at [www.navcen.uscg.gov](http://www.navcen.uscg.gov)

### LONG RANGE IDENTIFICATION AND TRACKING OF SHIPS (LRIT)

On April 29, 2008, the Coast Guard published in the Federal Register Vol. 73, no.83, the final rule that amended 33 Code of Federal Regulations (CFR) Part 169 to implement LRIT requirements in the United States. This rule requires, consistent with international law, certain ships to report identifying and position data electronically and became effective on May 29, 2008. Additionally, it implements an amendment to Chapter V of the International Convention for the Safety of Life at Sea (SOLAS), Regulation 19-1.

Additionally, the U.S. Coast Guard will operate the U.S. National Data Center (NDC), located in Martinsburg, West Virginia, which will become operational on December 31, 2008. The U.S. NDC will be responsible for the collection, dissemination and management of all LRIT data submitted by U.S. flagged vessels subject to the LRIT regulations. In addition, the U.S. NDC will collect foreign flagged vessel LRIT information from other data centers based on LRIT entitlements.

Furthermore, the U.S. has agreed to operate the International Data Exchange (IDE) on an interim basis from December 31, 2008 until December 31, 2011. During this interim period, the IDE will also be operated by the U.S. Coast Guard in Martinsburg, West Virginia.

Beginning January 1, 2009, the U.S. Coast Guard will examine foreign and U.S. flagged vessels subject to the LRIT regulations to determine status of compliance.

U.S. flagged vessel operators subject to the regulations may view information on how to comply by following the Domestic Vessels links on the USCG Homeport website at: <http://homeport.uscg.mil>.

All U.S. flagged vessel operators subject to the LRIT Regulation are encouraged to visit <http://www.navcen.uscg.gov/lrit/default.htm> to review the latest information regarding LRIT implementation and conformance test scheduling.

#### **ESTABLISHMENT OF LONG RANGE IDENTIFICATION AND TRACKING (LRIT) HELP DESK**

The USCG Navigation Center (NAVCEN) announces the operation of the Long Range Identification and Tracking (LRIT) Business Help Desk. The LRIT Business Help Desk will monitor LRIT system and process inquiries from the public and USCG Partners.

For more detailed information regarding U.S. LRIT rulemaking, please refer to the LRIT final rule, published in the Federal Register, Department of Homeland Security, 33 CFR Part 169, on Tuesday, April 29th, 2009, or visit the LRIT Business Help Desk section of the NAVCEN website at <http://www.navcen.uscg.gov/lrit>. The LRIT Business Help Desk. Phone number is: (703) 313-5788 or (866) 944-LRIT (5748).

#### **NORTH ATLANTIC RIGHT WHALES WARNING: Updated Version.**

NORTH ATLANTIC RIGHT WHALES WARNING: Updated Version.

From November to April the coastal waters between Altamaha Sound, GA, and Sebastian Inlet, FL, are used as calving grounds by the critically endangered right whale. Critically endangered right whales, including females with very young calves, may be encountered in offshore and coastal waters. Right whales are slow moving and at risk of serious injury or death due to collisions with vessels. Beginning December 9, 2008, U.S. law (50 CFR 224.105) prohibits operating vessels 65 feet (19.8 M) or greater in excess of 10 knots in specific managed locations along the U.S. East Coast during times when right whales are likely to be present. See enclosed "Compliance Guide for Right Whale Ship Strike Reduction Rule" for specific times, areas, and exceptions to this law. Intentionally approaching within 500 yards of right whales is prohibited and is a violation of U.S. law. A minimum distance of 500 yards must be maintained from a sighted right whale unless hazardous to the vessel or its occupants. NOAA recommends that operators assume that any whale sighting is a right whale. NOAA also recommends speeds of 10 knots or less in areas used by right whales and outside of seasonally managed areas when consistent with safety of navigation. NOAA also recommends operators use two-way whale avoidance routes within the WHALESSOUTH MSR area. Please report all right whale sightings and collisions to 877-433-8299 or the Coast Guard via channel 16. For more information, consult the U.S. Coast Pilot.

Vessels that report MSR arrivals via TELEX must use the new number 48156090 effective immediately. The existing e-mail address currently in use ([rightwhale.msr@noaa.gov](mailto:rightwhale.msr@noaa.gov)) remains active. WHALESSOUTH Mandatory Ship Reporting area is active from November 15 to April 16.

#### **NOAA's NATIONAL OCEAN SERVICE: Removal of State Plane grid intersection tick marks from all nautical charts.**

NOAA's National Ocean Service is evaluating specific features on nautical charts for their importance to marine navigation. The goal is to improve clarity and ease of use. To achieve this, NOAA's National Ocean Service is proposing the removal of State Plane grid intersection tick marks from all nautical charts.

The State Plane coordinate system was established by the U.S. Coast and Geodetic Survey in 1933 to provide a common reference system for surveyors and cartographers. State plane ticks marks are not necessary for marine navigation.

This change is expected to affect new chart editions commencing in 2009.

This proposed change will be advertised on The Office of Coast Survey website under "Latest News" <http://www.nauticalcharts.noaa.gov>. Comments about these changes may be sent to NOAA through the form at <http://ocsddata.ncd.noaa.gov/ldrs/inquiry.aspx> before February 20, 2009.

### **NOAA's NATIONAL OCEAN SERVICE: Removal of Tide Tables and Tables of Small Craft Facilities.**

NOAA's National Ocean Service is evaluating specific features on nautical charts for their importance to marine navigation. The goal is to improve clarity and ease of use. To achieve this, NOAA's National Ocean Service is proposing the removal of:

- Tide tables
- Tables of small craft facilities

Both of these tables will be removed from the following charts:

18661 18662 18687

Tidal information will continue to be available at <http://tidesandcurrents.noaa.gov>

These changes are expected to affect new chart editions commencing in 2009.

The proposed changes will be advertised on The Office of Coast Survey website under "Latest News" <http://www.nauticalcharts.noaa.gov>. Comments about these changes may be sent to NOAA through the form at <http://ocsddata.ncd.noaa.gov/idrs/inquiry.aspx> before February 20, 2009.

### **CODE OF FEDERAL REGULATIONS -TITLE 33 PART 70 - INTERFERENCE WITH OR DAMAGE TO AIDS TO NAVIGATION**

No person, shall take possession of or make use of for any purpose, or build upon, alter, deface, destroy, move, injure, obstruct by fastening vessels thereto or otherwise, or in any manner whatever impair the usefulness of any aid to navigation established and maintained by the United States.

Recently several offshore NOAA data buoys parted their moorings and became adrift due to excessive strain on the mooring. These navigational data buoys collect valuable on scene weather data for all mariners. These buoys are anchored to the seabed, and some have a watch circle radius of over 1 nautical mile. Once the mooring is parted and the buoy is adrift only certain Coast Guard resources can reset the aid back on its intended station. Coordinating of resources to retrieve the buoy, and place it back on station is time consuming and sometimes take weeks, thus valuable weather information cannot be obtained and relayed to mariners in need of it.

Mariners are advised not to interfere with these aids to navigation and report any sightings of vessels tied off to them to the U.S. Coast Guard. Interference with or intentional damage to Aids to Navigation is a misdemeanor and shall be subject to a fine not exceeding the sum of \$500 for each offense (33 CFR 70.0).

LNM: 51/08

### **AUTOMATIC IDENTIFICATION SYSTEM (AIS) PROPOSED RULE**

The Coast Guard seeks comment on its proposed rulemaking (73 FR 78295), that clarifies existing Automatic Identification System (AIS) requirements (33 CFR 164.46) and expands AIS carriage beyond Vessel Traffic Service (VTS) areas, to all U.S. navigable waters; and, adds additional vessels to the requirement: commercial vessels carrying 50 or more passengers, fishing vessels 65 feet or greater, hi-speed passenger vessels, dredges and floating plants operating in or near channels or fairways, and vessels carrying or moving certain dangerous cargo. We invite you to visit [www.regulations.gov](http://www.regulations.gov) [Docket: USCG-2005-21869] to comment on our proposal and its significant changes to the current AIS requirements. For additional information on AIS and this rulemaking visit [www.navcen.uscg.gov](http://www.navcen.uscg.gov).

LNM: 52/08

### **TRANSPORTATION WORKER IDENTIFICATION CREDENTIAL (TWIC)**

TWIC was established by Congress through the Maritime Transportation Act of 2002 (MTSA) and is administered by the Transportation Security Administration (TSA) and U.S. Coast Guard (USCG). TWICs are tamper-resistant biometric credentials that will be issued to ALL USCG CREDENTIALLED MERCHANT MARINERS, as well as workers who require unescorted access to secure areas of ports, vessels, and outer continental shelf facilities.

By April 15, 2009, all USCG credentialed mariners will be required to hold a TWIC in order for their license, Merchant Mariner Document (MMD), Certificate of Registry (COR), or Standards of Training, Certification, and Watchkeeping (STCW) endorsement to remain valid. Failure to obtain

a TWIC may result in suspension or revocation of a mariner's credential under 46 U.S.C. 7702 and 7703.

To obtain a TWIC, an individual must visit an enrollment center where they will pay the enrollment fee, provide biographic information and a complete set of fingerprints, and sit for a digital photograph. Pre-enrollment is highly encouraged as it is designed to save the applicant time and provides the ability to make an appointment. You will need to pick up your TWIC, after being notified it is ready, at the same enrollment center where you applied. The cost for TWIC is \$132.50 and it is valid for five years. Mariners who already hold a USCG credential may pay a reduced fee of \$105.25, however, their TWIC will then expire when their USCG credential expires.

For more information on the TWIC program including enrollment locations please visit TSA's websites at <http://www.twicinformation.com/twicinfo/index.jsp> or <http://www.tsa.gov/twic>.

Additional information can be found on the Coast Guard's HOMEPOR website at <http://homeport.uscg.mil/twic>.

## SECTION IV - CHART CORRECTIONS

This section contains corrections to federally and privately maintained Aids to Navigation, as well as NOS corrections.

This section contains corrective actions affecting chart(s). Corrections appear numerically by chart number, and pertain to that chart only. It is up to the mariner to decide which chart(s) are to be corrected. The following example explains individual elements of a typical chart correction.

Chart Number	Chart Edition	Edition Date	Last Local Notice to Mariners	Horizontal Datum Reference	Source of Correction	Current Local Notice to Mariners

Corrective Action	Object of Corrective Action				Position	

(Temp) indicates that the chart correction action is temporary in nature. Courses and bearings are given in degrees clockwise from 000 true.

Bearings of light sectors are toward the light from seaward. The nominal range of lights is expressed in nautical miles (NM) unless otherwise noted.

**FLORIDA-SEACOAST-WEST PALM BEACH TO MIAMI: Offshore Safety, Savage and Recovery Operations.**

Lockheed Martin will be conducting offshore testing with support vessels from Sea Tow of Palm Beach, between the Lake Worth and Boynton Inlets, one (1) to five (5) miles offshore on or about February 1, 2009, with completion date on or about March 5, 2009.

First phase testing on or about February 1, 2009, will consist of helicopter operations conducting drop tests and these tests will be considered a hazard to navigation. Divers and RHIB boats will be conducting safety, savage and recovery operations.

During the second half of February and the beginning of March, testing will include anchored float balls with strobe lights, which will be monitored 24/7 by Lockheed Martin. The M/V Richard Becker and Sea Tow of Palm Beach will be the support vessels on scene for this event. During the evening hours the float balls will present a hazard to navigation due to reduced visibility and any heavy sea states.

**FLORIDA-INTRACOASTAL WATERWAY- WEST PALM BEACH TO MIAMI: Shoaling and Draft Restrictions in Lake Worth Inlet.**

The Palm Beach Harbor Pilots have experience additional shoaling in the Entrance Channel of Lake Worth Inlet. There will be a restriction of 30'-00" at high water slack on all inbound vessels and outbound vessels. Vessels carrying oil products will have a maximum draft of 29'-00".

Now that the settling basin to the north of the channel has encroached into the Channel, further shoaling will occur over time or with any additional adverse weather. All parties who have vessels that are close to the above limitations should keep in close contact with our office prior to the arrival of their vessels for any changes. The Pilots Association has been informed by the Port that a dredge is due very soon.

Vessels arriving within 3 feet of the maximum allowable draft for the Port of Palm Beach will be restricted to transiting at High Water Slack. Vessels that have a LOA of 600' or more or have a beam of 90' or more may have a further draft restriction. All drafts are for salt water. Please contact Mr. William G. Roden, Jr. at Office (561) 845-2628 with any questions.

### **OPERATION "ON GUARD"**

U. S. Coast Guard Marine Safety Office Miami announces Operation "ON GUARD". This operation is designed to employ Coast Guard - active duty, reserve and auxiliary, Federal Bureau of Investigation, US Customs Service, US Immigration and Naturalization Service and the Florida Department of Law Enforcement personnel in response to suspected terrorist activity at the waterfront facilities of the United States. South Florida is extremely vulnerable because it is the terminus of illegal alien and narcotics smuggling routes from the Bahamas, the Caribbean and South America. These routes are well established and are readily available for use by terrorist organizations. An urgent need existed to make the American Public equal partners in the fight on terrorism. Operation "ON GUARD" creates an effective deterrent measure that employs the eyes and ears of the marine industry and the boating public, people that know every inch of the coastline because it is where they work and play. Potential terrorists are put on notice that their activities will be seen and reported.

Operation "ON GUARD" takes a two pronged approach consisting of face to face visits by Coast Guard, FBI, USCS, INS and FDLE personnel combined with a coordinated joint agency media campaign to reach Marina Operators, Marine Dealers, Bridge Tenders, Commercial Fishermen, and the Boating Public. This operation relies on Coast Guard Auxiliary programs already in place like the "Clean Marina" program, Vessel Safety Checks, Marine Dealer Visits and the Commercial Fishing Vessel Safety Program to reach their normal customers, the waterfront users. The public is provided with the toll free number (1.800.424.8802) for reporting suspected terrorist activity to the National Response Center and the 1.800.BE ALERT number for US Customs along with a list of reporting criteria.

#### **Report:**

- Suspicious persons conducting unusual activities
- Individuals establishing businesses or roadside food stands in proximity to marina or bridge
- Unknown persons photographing or creating diagrams
- Unknown or suspicious persons loitering for extended periods of time
- Unknown or suspicious persons renting watercraft
- Suspicious vendors attempting to sell/deliver merchandise or drop off packages
